## Projects

### HomeLoan Rate of Interest

Jan 2023-Till Date

The Objective of the project is to change the HTML template UI as per client need, My responsibility was to restructure, recreate the UI layout and also create stepper form as the project purpose is to generate leads from people where Stepper form featured using JavaScript and jQuery, Validation of the form is made using jQuery form validation and integrated Google Appscript sheet for Back-end data, made the website all device responsive

**Site:** <https://www.homeloanrateofinterest.com/>

### Indemnity National Insurance

March 2023-Till Date

It is a Next.js project where I was responsible for creating the look and feel of the Website as per client need. Adding blog page in the site using props and stats, made the website all device responsive. Worked with the SEO team by solving SEO bugs where they use to audit the site and arises issues which is affecting people attraction from the site and making the site rank low in search console

**Site:** <https://www.indemnitynationalinsurance.com/>

### Other Projects

- Converted UI design (Figma) to webpage with fully mobile responsive.
- In a few websites, restructured the UI layout to better suit the needs of the users, also fixed various technical issues and UI problems.
- Worked with WordPress by creating few website using Elementor and WP Bakery page builder
